 - 3.3. 3.High voltage customers (60 kV)

1- Residential

1.1.Domestic use and private lighting

Prices are expressed in dirhams including VAT (VAT is 18%).

Consumption brackets per month	Price per kWh
0 to 100 kWh	0.9010
101 to 150 kWh	1,0732
151 to 200 kWh	1,0732
201 to 300 kWh	1,1676
301 to 500 kWh	1,3817
> 500 kWh	1,5958

1.2. Bi-hourly pricing

Dual-hourly pricing is mandatory for domestic and private lighting uses with an average monthly consumption exceeding 500 kWh.

► 1.2. 1. Hourly positions

The seasonal hourly positions are defined as follows:

	Winter from 01/10 to 31/03	Summer from 01/04 to 30/09
Peak Hours (PH)	from 5 p.m. to 10 p.m.	from 6 p.m. to 11 p.m.
Normal Hours (NH)	from 10 p.m. to 5 p.m.	from 11 p.m. to 6 p.m.

The time slots as defined above correspond to the GMT (Greenwich Mean Time) time system. In the event of a change to the GMT+1 or other time system, these time slots must be modified accordingly by shifting them by the same number of hours and in the same direction as the new time system adopted.

► 1.2. 2. Sales prices

The sales rates for electric energy according to the hourly posts are as follows :

Hourly positions	Peak Hours (HP)	Standard Hours (SHT)
Price per kWh	2,2441	1,2467

1.3. Nour system rates reserved for rural customers

More adapted to the consumption habits of the rural customer, the " **Nour** " system is a system based on the prepaid meter. To supply electricity, the customer can buy the desired quantities through recharge cards (from an amount of 20 dhs).

Prices are expressed in dirhams including VAT (VAT is 18%).

► 1.3.1. Domestic use

Power slices	Price per kWh
--------------	---------------

Power less than or equal to 1 KW	1,0700
Power between 1 KW and 2 KW	1,2207
Power between 2 KW and 3 KW	1,2681
Power greater than 3 KW	1,5407

1.3.2. Patented Use

Power slices	Price per kWh
--------------	---------------

Power less than or equal to 1 KW	1.5055
Power between 1 KW and 3KW	1,6332
Power between 3 KW and 6 KW	1,6985
Power greater than 6 KW	1,7639

1.3.3. Driving force, industrial and agricultural customers

Power slices	Price per kWh
--------------	---------------

Power less than or equal to 1 KW	1,4155
Power between 1 KW and 3KW	1,5150
Power between 3 KW and 6 KW	1.5545
Power greater than 6 KW	1,5809

1.3.4. Administrative Use

Price per kWh	1,9008
---------------	--------

1.3.5. Public lighting

Price per kWh	1.3885
---------------	--------

1.3.6. Bi-hourly pricing

Dual-hourly pricing is mandatory for domestic use and private lighting where the average monthly consumption exceeds 500 kWh.

1.3.6.1. Hourly positions

The seasonal hourly positions are defined as follows:

	Winter from 01/10 to 31/03	Summer from 01/04 to 30/09
Peak Hours (PH)	from 5 p.m. to 10 p.m.	from 6 p.m. to 11 p.m.
Normal Hours (NH)	from 10 p.m. to 5 p.m.	from 11 p.m. to 6 p.m.

The time slots as defined above correspond to the GMT (Greenwich Mean Time) time system. In the event of a change to the GMT+1 or other time system, these time slots must be modified accordingly by shifting them by the same number of hours and in the same direction as the new time system adopted.

1.3.6. 2. Sales prices

The sales rates for electric energy according to the hourly posts are as follows :

Hourly positions	Peak Hours (HP)	Standard Hours (SHT)
Price per kWh	2,2441	1,2467

2. Professional rates

2.1. General Tariff (MT)

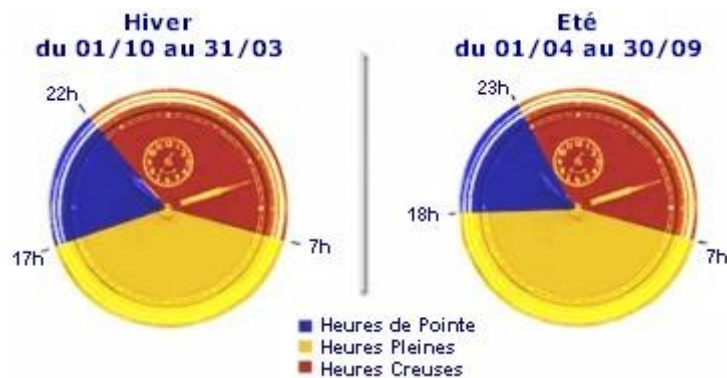

It consists of a fixed premium for the billing of the subscribed power and a kWh price per hourly item.

Prices are expressed in dirhams including VAT (VAT is 18%).

Fixed premium per KVA and per year	512.62
Consumption fee per kWh and per month	
Peak hours	1,4157
Peak hours	1.0101
Off-peak hours	0.7398

Seasons and Hourly Positions

The price of electricity depends mainly on consumption per hourly item. Good management of consumption schedules will therefore allow you to better control your electricity bill.

The time slots as defined above correspond to the GMT (Greenwich Mean Time) time system. In the event of a change to the GMT+1 or other time system, these time slots must be modified accordingly by shifting them by the same number of hours and in the same direction as the new time system adopted.

2.2. Green Tariff

The green tariff is intended for individual customers or companies carrying out an agricultural activity recognized by a certificate issued by the competent services of the Ministry of Agriculture.

The green tariff:

- Gives you the benefit of pricing options adapted to your annual duration of use, as well as dual seasonality (winter prices and summer prices);
- You do not need to subscribe to power, only the power called is billed;
- Allows you to optimize your consumption by avoiding peak hours by moving to normal hours.

The price of electricity varies depending on the tariff option of your choice, the season and the hourly consumption item.

► 2.2.1. Pricing Options

Three pricing options are offered depending on the annual duration of use of your consumption:

Pricing Options	Average annual usage time
TLU: Very Long Use	greater than 5500 hours
MU: Average Usage	between 2500 and 5500 hours
CU: Short Use	less than 2500 hours

► 2.2.2. Seasons and time positions

Two consumption periods are fixed during the year: **Summer from 01/04 to 30/10 and Winter from 01/11 to 31/03**.

Hourly positions vary by season as follows:

TIMETABLE POSTS	Winter	Summer
Peak Hours	5 p.m. to 10 p.m.	6 p.m. to 11 p.m.
Normal Hours	10 p.m. to 5 p.m.	11 p.m. to 6 p.m.

The time slots as defined above correspond to the GMT (Greenwich Mean Time) time system. In the event of a change to the GMT+1 or other time system, these time slots must be modified accordingly by shifting them by the same number of hours and in the same direction as the new time system adopted.

► 2.2.3. Green tariff

Prices are expressed in dirhams including VAT (VAT is 18%).

Pricing options	Fixed premium kW/year	Price per kWh			
		Peak hours		Normal hours	
		Winter	Summer	Winter	Summer
TLU	2,844.18	0.6874	0.6457	0.6228	0.5984
MU	1,279.88	1,3548	0.7724	1,0657	0.6755
CU	568.84	2,0220	0.8988	1,4646	0.7474
Power reduction coefficient		1	1	0.6	0.4

2. 3. Low voltage tariff - Professionals

► 2.3. 1. Driving force, industrial and agricultural customers

Prices are expressed in dirhams including VAT (VAT is 18%).

Monthly consumption brackets	Price of KWh
0 to 100 kWh	1,3639
101 to 500 kWh	1,4663
> 500 kWh	1,6758

2.3. 2. Patented clients

Prices are expressed in dirhams including VAT (VAT is 18%).

Consumption slices monthly	Price per kWh
0 to 150 kWh	1,5146
> 150 kWh	1,7090

- **Public Lighting** : the price of kWh is set at 1.3558 DH
- **Administrative Lighting** : the price of kWh is set at 1.6452 DH

2.4. Bi-hourly pricing

Bi-hourly pricing is mandatory for motive power customers whose average monthly consumption exceeds 500 kWh.

2.4. 1. Hourly positions

The seasonal hourly positions are defined as follows:

	Winter from 01/10 to 31/03	Summer from 01/04 to 30/09
Peak Hours (PH)	from 5 p.m. to 10 p.m.	from 6 p.m. to 11 p.m.
Normal Hours (NH)	from 10 p.m. to 5 p.m.	from 11 p.m. to 6 p.m.

The time slots as defined above correspond to the GMT (Greenwich Mean Time) time system. In the event of a change to the GMT+1 or other time system, these time slots must be modified accordingly by shifting them by the same number of hours and in the same direction as the new time system adopted.

2.4.2. Sales prices

The sales rates for electric energy according to the hourly posts are as follows :

Prices are expressed in dirhams including VAT (VAT is 18%).

Hourly positions	Peak Hours (HP)	Standard Hours (SHT)
Price per kWh	2,4250	1,3472

3. Key Account Rates

The very high voltage and high voltage (THT-HT) tariffs concern customers supplied from 60 to 225 KV. These are direct major account customers operating in the mining, cement and other industrial sectors.

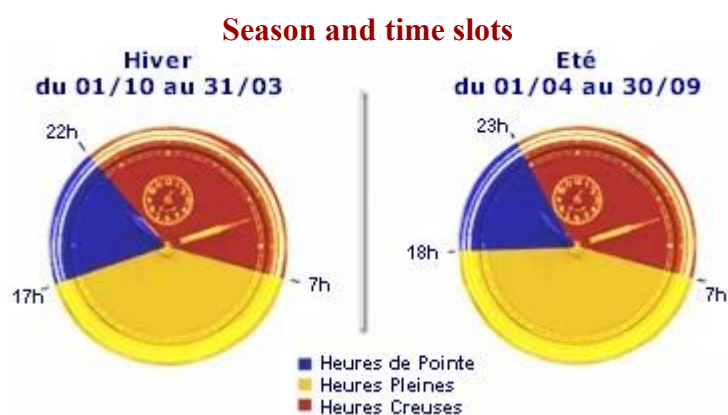

The THT-HT rates are divided into a general rate, an optional rate and an Optional “Super Peak” Rate.

3.1. General tariff

Consisting of a fixed premium for the billing of the subscribed power and a consumption charge per hourly item.

Prices are expressed in dirhams including VAT (VAT is 18%).

Fixed premium per kVA and per year	494.09
Consumption fee per kWh:	
Peak hours	1.3645
Peak hours	0.9736
Off-peak hours	0.7131

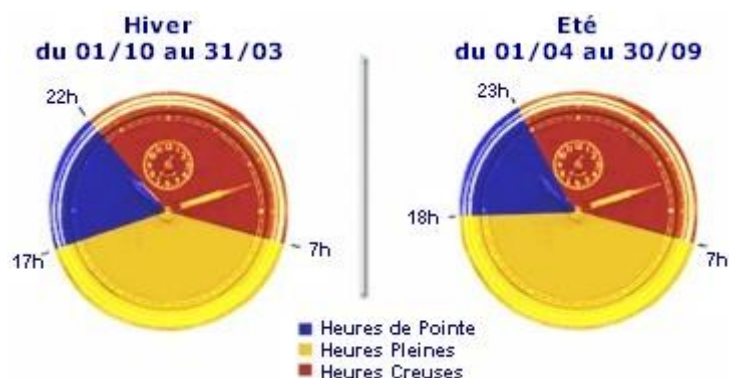

The time slots as defined above correspond to the GMT (Greenwich Mean Time) time system. In the event of a change to the GMT+1 or other time system, these time slots must be modified accordingly by shifting them by the same number of hours and in the same direction as the new time system adopted.

3. 2. Optional rates (THT-HT)

This tariff consists of four tariff options depending on the annual duration of use of the power. Each tariff option corresponds to a fixed premium for the billing of the subscribed power per hourly position, and a consumption fee per hourly position.

Pricing Options	Average annual usage time
TLU: Very Long Use	greater than 6000 hours
MU: Average Usage	between 3500 and 6000 hours
CU: Short Use	between 1000 and 3500 hours

Seasons and Hourly Positions

The time slots as defined above correspond to the GMT (Greenwich Mean Time) time system. In the event of a change to the GMT+1 or other time system, these time slots must be modified accordingly by shifting them by the same number of hours and in the same direction as the new time system adopted.

►3.2.1. Very high voltage customers (150 and 225 kV)

Prices are expressed in dirhams including VAT (VAT is 18%).

Pricing options	Fixed premium kW/year	Price per kWh		
		HP	HPL	HC
TLU	2,128.60	0.7833	0.6473	0.6077
MU	852.17	1,2477	0.7673	0.6077
CU	426.08	1,6454	0.8924	0.6348
TCU	378.00	1,9088	0.9213	0.6391
Power reduction coefficient		1	0.6	0.4

►3.2.2. High voltage customers (60 kV)

Prices are expressed in dirhams including VAT (VAT is 18%).

Pricing options	Fixed premium kW/year	Price per kWh		
		HP	HPL	HC
TLU	2,379.13	0.8265	0.6613	0.6263
MU	952.76	1,3561	0.7988	0.6263
CU	475.46	1,8101	0.9388	0.6567

TCU	421.81	2,0999	0.9692	0.6611
Power reduction coefficient		1	0.6	0.4

3.3. Optional “Super Peak” rates

This rate consists of four rate options depending on the annual duration of use of the power. Each rate option corresponds to a fixed premium for the billing of the subscribed power per hourly station, and a consumption fee per hourly station.

Pricing Options	Average annual usage time
TLU: Very Long Use	greater than 6000 hours
MU: Average Usage	between 3500 and 6000 hours
CU: Short Use	between 1000 and 3500 hours
TCU: Very Short Use	Less than 1000 hours

3.3. 1. Seasons and time positions

	Winter from 01/10 to 31/03	Summer from 01/04 to 30/09
Super Peak Hours	6 p.m. to 8 p.m.	7 p.m. to 9 p.m.
Peak Hours	from 5 p.m. to 6 p.m. and from 8 p.m. to 10 p.m.	from 6 p.m. to 7 p.m. and from 9 p.m. to 11 p.m.
Full Hours	7 a.m. to 5 p.m.	7 a.m. to 6 p.m.
Off-peak hours	10 p.m. to 7 a.m.	11 p.m. to 7 a.m.

The time slots as defined above correspond to the GMT (Greenwich Mean Time) time system. In the event of a change to the GMT+1 or other time system, these time slots must be modified accordingly by shifting them by the same number of hours and in the same direction as the new time system adopted.

3.3. 2. Very high voltage customers (150 and 225 kV)

Prices are expressed in dirhams including VAT (VAT is 18%).

Pricing options	Fixed premium kW/year	Price per kWh			
		SHP	HP	HPL	HC
TLU	2,128.60	0.8583	0.7818	0.6473	0.6077
MU	852.17	1,6892	1,0582	0.7673	0.6077
CU	426.08	2,2432	1,2427	0.8924	0.6348
TCU	378.00	2,6024	1,4417	0.9213	0.6391
Power reduction coefficient		1	0.8	0.6	0.4

3.3. 3. High voltage customers (60 kV)

Prices are expressed in dirhams including VAT (VAT is 18%).

Pricing options	Fixed premium kW/year	Price per kWh			
		SHP	HP	HPL	HC
TLU	2,379.13	0.8755	0.7975	0.6613	0.6263
MU	952.76	1,7908	1,1220	0.7988	0.6263
CU	475.46	2,5207	1.3965	0.9388	0.6567
TCU	421.81	2,9243	1,6201	0.9692	0.6611
Power reduction coefficient		1	0.8	0.6	0.4
